

Are Paver Stones Right For You ?

Ask the **big** questions and see for yourself ! These are the tough questions that you should be asking, so you can make a fair comparison between our beautiful **interlocking paver stones** and any other type of exterior “hardscape” surface for your home.

1. How **often** do you want to spend money to re-do this surface?
 - It's OK to have it re-done every few years
 - If I'm going to do it, I want to do it once, and do it right
2. How many **cracks** are you willing to live with ?
 - Concrete is OK with me ... even though I know it will crack after a while
 - I like “stamped” concrete ... even though they put the cracks in for you !
 - I want it to NEVER crack ... I want a **guarantee** that it will NOT crack !
3. Do you want your home to be **more attractive** ?
 - Driveways, patios and pool decks are supposed to be gray, aren't they?
 - I want my house to have an “extreme makeover”... I want it to be gorgeous !
4. What **financial** benefit (return on investment) do you want from this job?
 - I'm not counting on this project to add any value to the house.
 - I want every dollar that I invest to add almost TWO dollars to the value of my home!
5. What kind of **company** do you trust with your money and your home?
 - I'll take a chance with smaller companies that have less financial stability
 - I want 100% credibility, full insurance, and professional top quality workers !
6. When do you need the job actually done **right**?
 - It might take them a couple of times to do it right... that's normal
 - I'll be a lot happier if it's done right the first time !
7. Do you want it to be **repairable**, and have **access** to the utilities underground?
 - It's OK to have patches in the pavement after underground repairs
 - I want easy access to utilities, and I want to put it back together with NO patches!
8. How many **stains** do you want to live with?
 - I'll live with the stains, because cutting and patching looks even worse
 - I want to be able to remove stained pavers and put in new ones, so it stays beautiful !
9. What kind of **value** for the money do you want?
 - I could buy a light bulb for a dollar, that will last six months
 - I'll spend two bucks on a light bulb, **if** I never have to buy another one!

Ask us the same questions about a driveway, patio, or pool deck from Home Depot Paving / Barazani ... you'll be delighted with the answers !
